President signs NASA Flexibility Act of 2004 into law

NASA Administrator Sean O'Keefe expressed appreciation after President Bush signed the NASA Flexibility Act of 2004 into law last week. The law gives NASA more flexibility to restructure and revitalize its work force. "With fewer students entering math and science studies, there's greater competition to attract those graduates," O'Keefe said. "This law now gives us additional tools to address challenges we face in recruiting and retaining the exceptional talent required to carry out NASA's mission of exploration and discovery." For details on the new law, go to <http://nasapeople.nasa.gov/hclwp/index.htm>.

Office of Exploration Systems focus of Tuesday briefing

NASA TV will broadcast a briefing Tuesday on operations governing NASA's Office of Exploration Systems. The 10 a.m.-noon CST briefing will cover organizational structure and management priorities established by NASA to achieve exploration goals in human and robotic technology and transportation systems. These priorities are contained in the nation's "Vision for Space Exploration." Marshall employees can view the broadcast in Morris Auditorium and ask questions. For details, see "Inside Marshall."
